2014 Street Improvements

This newsletter is to keep you up-to-date with the upcoming road closures and schedule of the construction items associated with the project. We appreciate your patience through this process and apologize for any inconveniences.

The 2014 Street Improvement Project includes the repairs of Windy Hill Road, Windy Hill Court, and Angell Road. The project was let out for bid on April 16, 2014, with the low bid contractor being Danner, Inc. The work is scheduled to last 2-3 weeks.

Project Overview

The project consists of three portions of roadway (see the attached maps for project locations). The 1st portion being an overlay and driveway match ins of Angell Road from the cul-de-sac to the intersection with Sunnyside Lane. The 2nd portion of the project consists of a full depth reclamation with some subgrade corrections on Windy Hill Road to the intersection with Salem Church Road. The final portion of the project consists of full depth reclamation of the entire length of Windy Hill Court.

Construction Schedule:

Construction in this area should start July 14th and must be substantially complete by August 22, 2014. The project will require the roads to be closed to through traffic; however, **the Contractor must maintain access to local residents during construction. Access to the residential properties will be maintained at the end of the working day.** Residents, at times, pay experience short-term closures of access to complete the necessary construction, and the Contractor will work with those affected to mitigate the impacts. Please use caution when entering the work zone and follow the traffic control devices.

Mail and Garbage Collection:

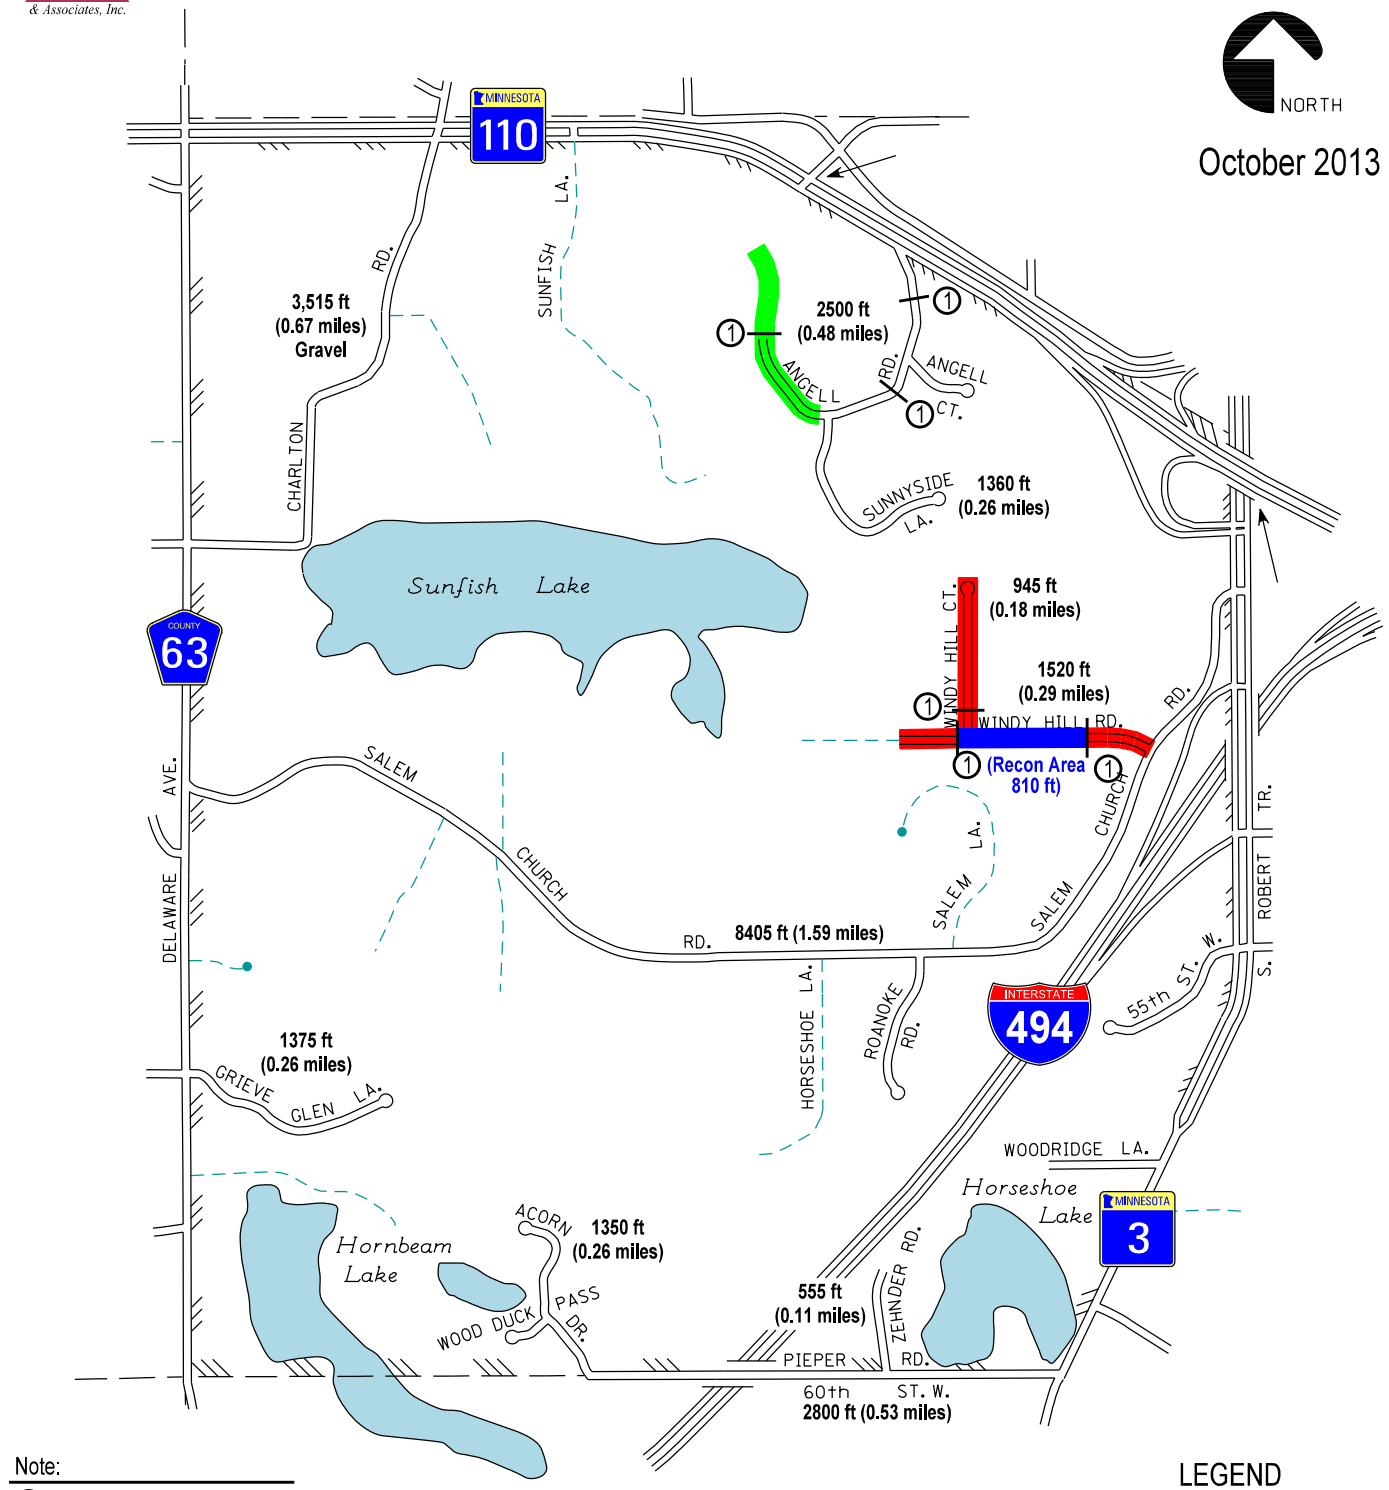

It may be necessary to relocated some of the mailboxes within the construction zone. The Contractor and City will coordinate this effort with the local post office to find a suitable temporary location outside of the construction limits. The post office will determine the locations of the temporary mailboxes, not the Contractor. We apologize in advance for any inconvenience. The Contractor and City will also be coordinating work with local garbage collection companies to ensure regular garbage pickup.

Questions or Concerns:

Please do not hesitate to contact the on-site construction inspector, Dan Ziebarth (contact info on the left) if you have any questions or concerns. Thank you!
